

Elad Reuveny

Full Stack Developer | Software Engineer

✉ eladre123@gmail.com 📁 Portfolio 🐙 GitHub 🔗 LinkedIn ☎ 0546494623

Full Stack Developer with a B.Sc. in Computer Science from The Open University of Israel. Experienced in designing and deploying scalable, production-ready applications using React, TypeScript, NestJS, PostgreSQL and Docker. Strong foundation in RESTful API design, microservices architecture (synchronous and message-driven communication), real-time systems, caching strategies, and database management, responsive UI/UX, and deploying apps on modern cloud platforms. Familiar with CI/CD pipelines and automated deployment workflows. A fast, self-driven learner with strong problem-solving skills, effective both independently and in team environments, and passionate about delivering high-quality, user-focused solutions using modern AI-driven development workflows.

🧠 Skills

Programming Languages: TypeScript, JavaScript, Java, C#, C/C++, Python

Frontend: React, Tailwind CSS, TanStack Query/Router/Form, Zustand & Jotai, HTML5, CSS3, Vite

Backend: Node.js (NestJS, Express.js), Spring Boot

Databases: PostgreSQL, MySQL, Redis

API & Security: REST APIs (Swagger/OpenAPI, Postman), WebSockets (Socket.io), JWT

DevOps & Cloud: Docker, CI/CD, AWS (S3, CloudFront, Route 53, ECS, RDS, IAM, CloudWatch), Netlify, Render, Neon

Tools: Git, GitHub, GitHub Copilot, Gemini CLI

📁 Projects

- Intellectify - Full Stack Social Media Platform | React, TypeScript, NestJS, PostgreSQL, Docker** 
- Architected modular microservices (API Gateway, Auth, Users, Posts, Mail) with asynchronous RabbitMQ communication.
 - Developed RESTful backend with NestJS, TypeORM, JWT auth, and role-based access control.
 - Built interactive frontend with React, Vite, Tailwind CSS; leveraged TanStack Query for server state and Jotai for client state management.
 - Containerized all services with Docker & Docker Compose for reproducible deployments.
 - Documented APIs using Swagger/OpenAPI and validated endpoints with Postman.
- Football API Manager | React, TypeScript, NestJS, PostgreSQL, Docker** 
- Designed and implemented a scalable RESTful API platform for managing and visualizing football data.
 - Integrated Redis caching to reduce database load and improve response times for high-volume endpoints.
 - Engineered secure JWT-based authentication and structured data models with PostgreSQL.
 - Built a dynamic React frontend with Vite, achieving a 15% improvement in load performance.
 - Containerized the full stack using Docker for consistent cross-environment deployment.
- Electronics - Full-Stack E-Commerce Platform | React, TypeScript, Spring Boot, PostgreSQL, Docker** 
- Built a full-stack e-commerce platform with user/admin roles, including authentication, product catalog, cart, wishlist, and order management, featuring search & filtering, real-time cart and wishlist updates, and an admin dashboard (CRUD & order tracking).
 - Developed RESTful APIs with Spring Boot, JPA, and PostgreSQL, including JSON/XML support for order export.
 - Implemented a modern React frontend using TypeScript, styled with Tailwind CSS, leveraging TanStack Query for server-state management and Zustand for client-state management.
 - Containerized the application using Docker and integrated CI/CD pipelines via GitHub Actions.
- Art Talks – Full Stack Real-Time Platform | React, TypeScript, NestJS, PostgreSQL, Socket.io, Docker** 
- Built a full-stack real-time platform combining an interactive art gallery with live chat using Socket.io.
 - Developed REST APIs with NestJS, TypeORM, and PostgreSQL for persistent data management.
 - Engineered scalable WebSocket architecture supporting rooms, concurrent users, and real-time state synchronization; built a responsive UI with React, TypeScript, Tailwind CSS, and TanStack Query.
- Custom Assembler/Compiler | C** 
- Built a custom assembler and compiler to convert assembly instructions into binary machine code.
 - Implemented lexical analysis, parsing, and code generation modules.
 - Optimized compilation accuracy, error handling, and execution performance.

🎓 Education

- B.Sc. in Computer Science | The Open University of Israel** 2021 – 2025
- Gained theoretical and hands-on knowledge in Data Structures, Algorithms, OOP, DBMS, Design Patterns and Multithreading.
- High School Diploma | Ohel Shem** 2011 – 2015
- Graduated with high honors; specialized in Computer Science stream.

👮 Military Service

- Aircraft Technician | Israel Air Force** 2015 – 2019
- Led a technical unit maintaining complex aircraft systems under high-pressure conditions; Gained leadership, troubleshooting, and precision work.

🏠 Community Involvement

- Volunteer Instructor | Yigal Alon School**
- Tutored and mentored students facing academic challenges, fostering a supportive learning environment.

🌐 Languages

Hebrew - Native | English - Advanced Proficiency
